EGDR808 DRUM MACHINE

PATTERN PLAY

You can choose one of the 12 rhythm pattern or one of the 4 fill available.

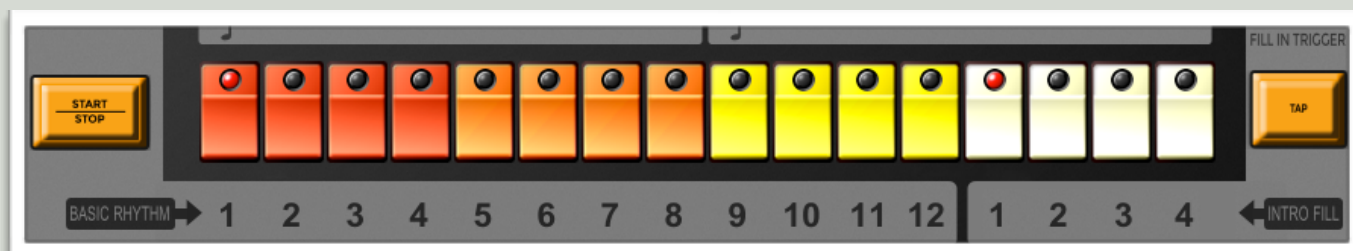

First of set the play mode knob on MANUAL PLAY, then click on one of the 16 step buttons to choose one of the 16 rhythm saved into the current preset.

Now press the START/STOP button to start the step sequencer and rotate the TEMPO knob to set your desired tempo; you can choose another groove clicking again on one of the 12 step buttons, or you can

enqueue a fill pressing the TAP FILL button.

When EGDR808 is playing, you can stop the sequencer with the STOP button - The sequencer will stop when reaching the last step.

It's also possible to set the AUTO FILL IN, choosing after how many measures the selected fill will be auto triggered - available values are 16, 12, 8, 4 or 2 measures.

RECORD YOUR PERFORMANCE

Set the play mode knob on RECORD PATTERN to save your songs and patterns into an audio file.

When the record mode is enabled, just press the START button and play any pattern you want. When you will press the STOP button a recording of your performance will be saved into the MUSIC folder of your device

PATTERN CLEAR

Set the play mode knob on PATTERN CLEAR to delete a pattern; user can choose the pattern to clear and apply it by pressing the red button next to the play mode knob.

PATTERN WRITE

Rotate the play mode knob on PATTERN WRITE.

Now click on one of the 16 step buttons to choose what pattern you want to edit, and press the START button to listen to it.

User can edit each instrument individually, clicking on the INSTRUMENT button in the top section of the app to choose the drum kit piece to edit.

When the flashing light that indicates the current position of the sequencer will reach the steps enabled for the selected instruments, the sound of the chosen drumkit piece will be triggered.

The step sequencer will be enlighten according to the pattern groove, and you can tap on the step you need to make the selected instrument play.

The volume for sound with accent will be controlled by the ACCENT level knob in the top of the screen.

When the pattern writing has been finished, you have to rotate the play mode knob to MANUAL PLAY to set EGDR808 in PATTERN PLAY mode.
